RANGE BROCHURE

MAJESTIC F1	<i>Basil</i>	
-------------	--------------	--

Majestic is a hybrid basil with a typical Genovese spoon shape leaf. It has a strong, well balanced plant with short internodes. With dark, glossy green leaves, and a strong sweet aroma, Majestic can be used for bunching, fresh pack and salad mixes, harvesting during the warmer to cool production slots. Intermediate resistance to Fusarium.

LARGE SWEET	<i>Basil</i>	
-------------	--------------	--

Large Sweet is a basil with a typical Genovese spoon shape leaf. It has medium dark, glossy green leaves, and a strong sweet aroma. Use Large Sweet for bunching, fresh pack and salad mixes, harvesting year round.

CHERVIL	<i>General</i>	
---------	----------------	--

Chervil is an annual herb with a bright green fern shaped leaf. It has a strong sweet aromatic spicy taste, and is suitable for bunching and salad mixes. Chervil is best grown in mild climates and in semi shade.

SAGE	<i>General</i>	
------	----------------	--

Sage is a perennial herb with grey green velvety leaves. It has a highly aromatic flavour, and is suitable for bagging or drying. Sage can be grown year round.

RED VEINED SORREL	<i>General</i>	
-------------------	----------------	--

Red Veined Sorrel is a particularly attractive perennial herb with red stems and strongly defined red veins which contrast sharply with bright green leaves. The young leaves have a sharp and tangy dry flavour. Red Sorrel is best suited to glass or poly tunnel production.

DILL	<i>General</i>	
------	----------------	--

Dill is a perennial herb with feathery blue green leaves. High quality line with improved yield and colour. It has a pungent, aromatic flavour, and is suitable for fresh bunching when harvested at about 40cm, or can be sold in pots. Dill can be grown year round for baby leaf production.

CRUISER	<i>Coriander</i>	PBR 2016/090 'CRUISER'
---------	------------------	------------------------

High yielding coriander line with good quality. Cruiser has exceptional bolting tolerance, a dark green colour and strong aromatic flavour.

Unauthorised commercial propagation or any sale, conditioning, export, import or stocking of propagating material of this variety is an infringement under the Plant Breeder's Rights Act 1994. PBR 2016/090 'CRUISER'

CHIVES	<i>General</i>	
--------	----------------	--

Chives are a perennial herb with blue green leaves. They have a mild fresh onion flavour, and are suitable for bunching and salad mixes. Chives can be grown year round.

LEFROY'S SANTO MONO GERM	<i>Coriander</i>	
--------------------------	------------------	--

Lefroy's Santo Monogerm coriander is an annual herb in a mono germ form, with bright green leaves. It has a highly aromatic flavour, and is suitable for bunching and salad mixes. Lefroy's Santo Monogerm coriander is best harvested in spring through to autumn.

PINOCCHIO	<i>Fennel</i>	
-----------	---------------	--

Pinocchio fennel has a uniform round shape, and is bright white in colour. Ideal for late summer to autumn harvest.

HERCULES	<i>Parsley</i>	
----------	----------------	--

Titan type of parsley, with large flat-leaves with a glossy dark green colour. It has an erect habit and is more flavorful than regular plain-leaf types. This variety is used for fresh market bunching, processing and home garden.

PRIMUS	<i>Rocket</i>	
--------	---------------	--

Primus is a slow bolting form of rocket with a large lobed, bright, medium dark green leaf. Primus has a mild spicy aroma and a thicker leaf texture than Lefroy Valley's standard Rocket. Primus is ideal for the baby leaf market, adding a new dimension to salad mixes, and is suited to year round production.

BREAKAWAY	<i>Rocket</i>	
-----------	---------------	--

Breakaway is a fast growing, indented rocket with good erectness, excellent leaf thickness and a medium to dark green colour. This variety has an improved colour and shelf life. Its flavour is milder than European wild rocket, but is very similar to Speedy Wild rocket.

Breakaway is suited to all year round production in Tasmania, Queensland and Western Australia. Victoria mainly use Breakaway in mid winter production.

ROCKET	<i>Rocket</i>	
--------	---------------	--

Rocket has a round tipped, lobed, bright green leaf. It has a mild spicy aroma and a thicker leaf texture than standard rocket.

Rocket is ideal for the baby leaf market, adding a new dimension to salad mixes, and is suited to year round production.

ADAGIO	<i>European rocket</i>	
--------	------------------------	--

Adagio is a slower maturing selection of European wild rocket with a heavily serrated, dark green, thick leaf. It has shown excellent bolting tolerance. It has a pungent spicy aroma, an erect growth habit and is ideally suited to summer to autumn production. Adagio is ideal for the baby leaf market, harvesting summer to late autumn.

PRONTO 2	<i>European rocket</i>	
----------	------------------------	--

Pronto 2 is a fast growing form of European wild rocket with a heavily serrated, dark green leaf. It has a pungent spicy aroma, an erect growth habit and is ideally suited to winter production.

Pronto 2 is ideal for the baby leaf market, adding a new dimension to salad mixes, and is suited to harvesting in the autumn through to early winter.

LENTO	<i>European rocket</i>	
-------	------------------------	--

Lento is a uniform vigour European Wild Rocket with a slightly broader leaf style. Colour is dark green. Lento is suited to direct sowing and the transplant market, and has shown good durability and shelf life.

OBERON	<i>European rocket</i>	TOZER SEEDS
--------	------------------------	--------------------

Wild rocket with dark green highly indented leaves. High leaf number means yields are excellent. Bolting tolerance is exceptional for summer production.

MISO	<i>Kohlrabi</i>	
------	-----------------	--

Miso is light green uniform, with smooth bulbs with erect plant habit. Miso has a flat round shape 10-12cm diameter and 9-10cm height, 600-800 grams, for processing can size 14-16cm diameter, 10-12 cm height and weight 1 to 1.5kg. Harvest season All year round. Maturity average 75 days depending on season.

IR: XCC

NATO	<i>Kohlrabi</i>	
------	-----------------	--

Dark purple uniform, smooth bulbs with erect plant habit and strong vigour. Round to round elongated shape 8-9cm diameter and 9-10cm height, 600-750 grams, for processing can size 9-12cm diameter, 12-14 cm height and weight 700-900 grams. Harvest season all year around except spring. Maturity average 80 days depending on season. IR: XCC

DISEASE KEY DEFINITIONS

HR: Highly resistant plant varieties would highly restrict the growth and development of the specified pest or pathogen under normal growing conditions and pest pressure when compared to susceptible varieties. These plant varieties may, however, exhibit some symptoms or damage under heavy pest pressure or stressful growing conditions.

IR: Intermediately resistant plant varieties would restrict the growth and development of the specified pest or pathogen. The plant variety may however exhibit a greater range or degree of symptoms when compared to a highly resistant variety. Intermediately resistant plant varieties will still show less severe symptoms or disease damage than susceptible plant varieties when the crop is grown under similar environmental conditions and is subjected to the same disease or pest pressure.
